Order Star

Procurement management with OrderStar

Vessel

for the fleet

With OrderStar Vessel your crew on board can make quick and easy orders to reserve parts, consumer products, provision and of course servicerequests in a clearly arranged form. The orders can be sent by email, fax and telex.

· Easy installation
· Clear window technique
· Integrated help system
· English user guidance
· Password protection
· Simple back up system
· Import/Export functions
· No additional software licences required
· Order sorting by processing status
· Free definable article master
· Grading of commodities
· Article management with shopping cart
· Warehouse management and inventory analysis
· Controlled goods receipt with aid of reports

OrderStar Vessel is an independent program, that needs no additional complicated or expensive software.
It can be installed on any standard computer system and provides a formatted text file, which contains all of the ships important order information in compressed form. This text can be sent beneficially both by email, fax and telex. Due to the free definable article master and user can start ordering immediately.

Once/prepared positions can be deposited in a virtual shopping cart and may be ordered again. The article database fills up itself automatically with the most important data and therefore, time and effort for input will be noticeable reduced for the next ordering. If wanted, the database can be configured and arranged before installation.

Goods receipts can be recorded and prosecuted by the ship staff.

Automatic generated lists of received or not received positions with possible adjustment by the shipping companies data complete the order process.

Office

for the shipping company

With OrderStar Office you can optimize ordering within the shipping company. Orders of your fleet can be imported and adjusted. Price quotations and orders about requirements for ship and company are released at the supplier.
Goods receipt in intermediate stores can be controlled and, if necessary, redirected in collective deliveries.

· Single−user and network version
· Modular system
· English user guidance
· No additional software licences required
· Simple administration tools
· Manager arrangement for clear view and transparency
· Import Manager for automatic import of board orders
· Order Manager to edit board and shipping company requirements
· Price Quotation Manager for quote requests
· Requisition Manager for orders to the furnisher
· Inventory Manager for warehouse control
· Dispatch Manager for mail orders
· Address Manager for quick furnisher selection

The progress from an order process will be selected in every manager through an automatic assigned status. This guarantees that every operation will be elaborated in time and that the required goods will be delivered on schedule.

From the board orders over the price quotation in the office, the goods receipt in the intermediate stores and the extradition to the ship is every operation represented in a clearly and simple form, for an easy comprehension.
By aid of interfaces of current communication and office solutions, it is possible to integrate OrderStar in an existing infrastructure.

With **OrderStar** you can optimize ordering within the shipping company.
